

LED LINEAR HIGH BAY LIGHT

Installation Guide

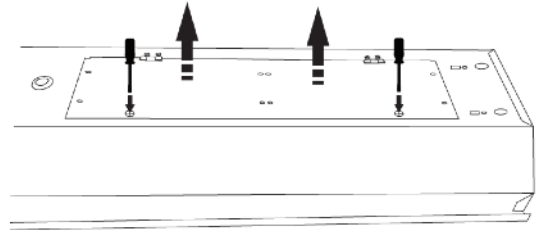

1. Turn power off before inspection, installation or removal.
2. The installation should be performed by qualified electricians or lighting technicians.
3. Before conducting any installation, maintenance, or removal, disable all power to the luminaries and wait until the fixture cool down.
4. Do not touch the fixture while it is in service.
5. If there is any problem with the fixture, DO turn off power and DO NOT attempt repair unless you are a qualified technician or the customer service member.

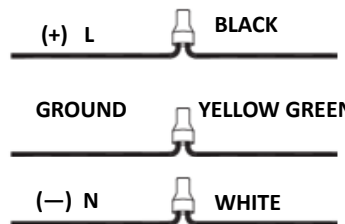

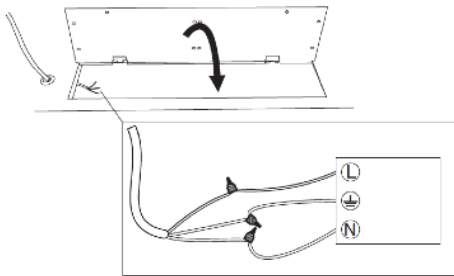

Suspended from metal chain and V hooks.

Loose the screws and open the back cover.

Pass the power cord through the cable entry hole, and wire connecting by wire nuts.

LIGHT FIXTURE

Close the back cover and tighten the screws, then it is safe to operate the light.
